

Exercises customized to meet regulations, your specific situation and your budget!

In order to assist airports in meeting Transport Canada Regulations, we have built training courses and exercises to meet the Canadian Aviation Regulations (CARs) outlined in section 302.208 - Testing of the Emergency Plan. We are now bringing these exercises to airports throughout Canada.

The Loomex Team has extensive experience in the Emergency Management and Communications fields with specific expertise in aviation, emergency and municipal response. Loomex provides the following suite of exercises that can be tailored to the individual needs of any organization.

- Table-top
- Paper exercises
- Large-Scale full field (Night or day)
- Large-Scale multi-site
- Work-shop style (seminar)
- Drill

Preparing Your Team In Case of an Emergency

When you choose Loomex to train your staff, you are choosing a dynamic team of professionals dedicated to delivering the very best in emergency preparedness.

Our exercises help your team understand what their role is in the case of an emergency. We work with you ahead of time to prepare an exercise that they can relate to, that is realistic and all-inclusive. Our staff run exercises at an appropriate pace and stop for “learning breaks” when needed. Safety is our top priority and we ensure that the participants are safe first and foremost.

Outcomes:

Following participation in our exercises you and your team will:

- feel more confident in their ability to deal with an emergency
- understand their individual roles
- understand where improvements need to be made and if additional training is needed
- be compliant with Transport Canada recommendations
- be compliant with CARs regulations
- be able to operate your airport with greater confidence

Our staff are prepared to start working with you to customize an exercise to suit your airport.

Emergency Management in Aviation

Regardless of the size of your Airport, the risks and consequences of operating an Airport are high. This three-day course teaches the basics of Emergency Management as it relates to aviation. This course includes the following topics:

- Emergency Management Concepts
- The Importance of Emergency Exercises
- Working in an Emergency Operations Centre
- Interacting with Emergency Services
- Understanding the Incident Management System
- Managing the Site as the On Scene Controller
- Crisis Communications
- 3 Simulated Exercises where participants will experience different roles
